

New to Omnis, or still learning?

Whether you are new to Omnis or you are an experienced developer wanting to learn new skills, there is plenty of help at hand, some of it provided by Omnis, and some of it available from third parties. There is a lot of expert Omnis knowledge out there in the Omnis development world: this guide tells you where to find it. The first few options will cost you nothing, but will save you many hours in your development projects.

Omnis Webinars – for all levels of user, from beginner to expert

These are online seminars or demo sessions, held via the Omnis website several times a week. They are designed for complete beginners and experienced developers alike, and include topics such as: an Introduction to Omnis, Migration made easy, Rich Internet Applications, Data migration in Omnis, Omnis Web Services. They are free of charge and available in English and German. Go to: www.omnis.net/webinars

Tech Notes – a diverse source of technical hints and tips

There is a large library of technical notes on the Omnis website, about a whole range of topics in Omnis development. Many of the tech notes have been written by our support and technical staff and complement the official product documentation. Topics include Client/Server and SQL Programming, GUI and Application design, Omnis Web Client and Ultra-thin Omnis, Data management, and so on. Read the tech notes here: www.omnis.net/technotes

Technical newsletter – Omnis knowledge in your mail box

Contains in-depth explorations of particular Omnis features, such as variables, lists, graphs, reports, notation, and so on. You can sign up here: www.omnis.net/news/omnis-news.html, or you can read all the back issues (over 5 years worth) here: www.omnis.net/news/techbackissue.html

Developer Mailing List – to get instant technical answers

Known in the Omnis developer community as "the List", this is an email based mailing list run by Omnis developers, for developers. On the list, a developer can ask a technical question and other developers are sure to answer or discuss the solution to the problem. The Omnis list is available in English, French, German, Italian, and Spanish. Sign up here: www.omnis-dev.com

StudioTips – a valuable coding tool

This valuable resource has grown into an essential toolkit for any Omnis developer. It is packed full of code samples and tutorials, and is available free or on subscription. Download it from here: www.studiotips.net

David Swain – the original Omnis guru

David is well known in the Omnis community and has been using and writing about Omnis for many years. His web site has some very useful tutorials and tips, as well as free libraries. He also writes for the Tech newsletter. See his website here: www.omnistraining.com

Developer Conferences – a fun way to learn Omnis

The Omnis developer community hold a conference once a year, usually in Europe. The conferences are usually held over a week and are a great opportunity to learn about Omnis and share knowledge of the product. For more details, go to: www.euomnis.org

Technical Support – a world class resource

If you are a professional developer and want to use Omnis to build applications for resale or to support your organisation, then you should sign up to the Omnis Developer Partner Program (ODPP). For a little more than the cost of a Web Edition, you get the full SDK and unlimited one-to-one telephone and e-mail access to our world-class technical support team. More info here: www.omnis.net/developer

Omnis Training – get up-to-speed in Omnis, fast

This is one of the most cost-effective ways to learn Omnis, and allows you to build your application quickly and easily. Training courses are held in the UK, Germany and other European locations, on all areas of application design, including the Omnis web client, object-oriented programming, the notation, and more. Full details here: www.omnis.net/training
